Professional Objective

Professional with experience in process automation with UiPath and training in front-end web development. Interested in opportunities that allow me to contribute technological solutions while continuing to grow in both areas.

Technical Skills and Courses

- UiPath
- HTML, CSS, JavaScript
- React Js Básico.
- Java
- MySQL
- Photoshop

Experience

- **Order Confirmation and Inventory Control**

Valle Redondo

Control and verification of orders to be sent to different companies as well as inventory control.

2018 - 2020

- **UiPath Developer**

Softtek

- Development and execution of bots created on virtual machines in UiPath for automated information management to reduce staff time.
- Development and support L1 and L2 for applications developed with UiPath with monitoring through Orchestrator and implementations requested by the client.

2020 - 2024

Personal Projects

.Net application development with Windows
Forms

Project developed in Visual Studio in C# with Windows Forms focused on inventory management with a local database in MySQL.

Github portfolio of web applications

My portfolio on Github where I have my web applications that I constantly practice:: github.com/Vazpei/alanv-dev
